

Mahindra Vishal

TamilNadu, India | +91 80156 85885 | dmahindravishal@gmail.com | [Mahindra Vishal | LinkedIn](#) | [Portfolio Website - mahindravishal.dev](#)

Gameplay Programmer with hands-on experience building gameplay systems in Unity using C#, with experience in player controls, gameplay mechanics, FSM-based character architecture, multiplayer development, and performance-oriented systems.

PROFESSIONAL EXPERIENCE

RESENGAL STUDIO

Unity Developer Intern | APRIL 2026 - PRESENT | Remote

Developing player controls and gameplay mechanics for a 3D multiplayer horror mobile game in Unity, collaborating with developers to implement and iterate on player-facing systems.

KIDORALEARN

Unity Developer Intern | AUG 2025 - MARCH 2026 | Remote

Worked with developers and designers of Kidoralearn. Developed a kids learning app with interactive games. I worked on gameplay programming, bug fixing and improved my problem solving skills.

PROJECTS

Third Person Player Movement System (Using Finite State Machine)

Developed a modular **third-person character movement system in Unity using C# and a Finite State Machine (FSM)**.

- Implementing responsive locomotion, smooth in-place turning, jump and fall state handling, and grounded detection.
- Built a **raycast-based step-climbing system** to detect and smoothly traverse small environmental obstacles.

Save the Balloon — *Android game made with Unity*

A fun and casual 2D endless runner game. Developed using Unity and C#.

- Used **object pooling technique** to reduce garbage collection and improve performance with smooth controls and responsive gameplay mechanics.
- Designed custom animations, particle effects, and audio for an engaging player experience
- Integrated Unity Ads for monetization.

Crash and Chaos – 3D co-op endless runner made with Unity and C#

3D cooperative endless runner developed for the Indie Connect Game Jam.

- Implemented endless platform spawning using object pooling technique and gameplay systems.
- Designed level layouts, integrated audio systems, and implemented input handling for both player roles.

EDUCATION

Sastra Deemed University, TamilNadu — *B.tech, Information and Communication Technology*

Aug 2023 - Present | Currently Pursuing | Expected Graduation: May 2027..

SKILLS

PROGRAMMING : C#, C++, SQL

COMPUTER SCIENCE: Data Structures & Algorithms, Object-Oriented Programming

GAME ENGINE : Unity 3D & 2D

TOOLS : Visual Studio, Unity Version Control, Git Hub, Antigravity

OTHER

Certification - UNITY CERTIFIED ASSOCIATE GAME DEVELOPER

- Selected among 500 participants from Tamil Nadu and Maharashtra for the Google × Unity Training Program.
- Achieved Top Scorer recognition in the Unity Certified Associate Game Developer track.
