SUMMARY

Gameplay Programmer with hands-on Unity/C# experience across player controllers, FSM-driven character systems, multiplayer networking, and performance-focused gameplay code.

EXPERIENCE

RESENGAL STUDIO

April 2026 – Present

Unity Developer Intern

Remote

- Engineered multiplayer gameplay systems for a 3D horror game in **Unity/C#** using **Purrnet**.
- Developed a modular **interaction system** supporting object pickup, throw, hiding mechanics, and environmental interactions.
- Configured **networked ownership handling** to synchronize pickup-object state across multiplayer clients.

KIDORALEARN

August 2025 – March 2026

Unity Developer Intern

Remote

- Developed and maintained **15+ interactive learning activities** in Unity, integrating gameplay logic, animation, audio, and UI.
- Resolved **100+ gameplay and integration bugs** across multiple learning modules.
- Collaborated with designers to refine interactive learning experiences and implement gameplay requirements.

PROJECTS

Third Person Player Movement System (Using Finite State Machine)

- Architected an **FSM-based** locomotion system with Idle, Walk, Run, Jump, Fall, and Crouch states.
- Programmed interpolated character rotation with animation-driven in-place turning for responsive movement.
- Engineered a **raycast-based** step-climbing system for traversing stairs and small environmental obstacles.

Save the Balloon — Android game made with Unity

- Published a 2D endless runner in Unity/C#, integrating **Unity Ads** for in-game monetization.
- Optimized runtime performance through **object pooling**, reducing unnecessary allocations and garbage collection during gameplay.
- Created custom animations, particle effects, and audio to enhance gameplay feedback and presentation.

Crash and Chaos – 3D co-op endless runner made with Unity and C#

- Prototyped a cooperative 3D endless runner for the Indie Connect Game Jam, implementing endless platform spawning through object pooling.
- Crafted level layouts and integrated audio and input systems for both player roles.

EDUCATION

Shanmugha Arts, Science, Technology & Research Academy (SASTRA) August 2023 – May 2027

B.Tech - Information and Communication Technology

TECHNICAL SKILLS

Languages: C#, C++

Computer Science: Data Structures & Algorithms, Object-Oriented Programming

Game Engine: Unity 3D & 2D

Tools: Visual Studio, Unity Version Control, GitHub

CERTIFICATION & ACHIEVEMENTS

Unity Certified Associate Game Developer

- * Selected among **500 participants** from Tamil Nadu and Maharashtra for the **Google × Unity training program**.
- * Achieved **Top Scorer** recognition in the Unity Certified Associate Game Developer track.
